Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 1 states that the claim is drawn to a photosensitive material, however the body of the claim does not contain any photosensitive element(s). Therefore, the scope of the protection sought is unclear.

Claims 3-6 are not included in this rejection because claim 3 provides for a photosensitive layer.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,702,850 to Nishioka et al. (Nishioka). Nishioka discloses a thermosensitive recording material comprising a thermosensitive reversible color developing and disappearing material, wherein the material is made to be colored upon

heating to a color developing temperature, and then the color disappears when heated to 50-120 C. See the abstract and column 14, lines 43-46. The thermosensitive reversible color developing and disappearing agent comprises a dye precursor, a specified color-developing and disappearing agent and a binder (see column 14, lines 13-24), and may further comprise a phenolic color developing agent (see column 15, lines 43-52) and a sensitizing agent including an ether (e.g. benzylnaphthylether, see column 16, lines 26-28) or esters (e.g. oxalic acid diesters, see column 16, lines 37-38).

Pertinent Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,725,990 discloses a silver halide light-sensitive material comprising a support having thereon a light-sensitive silver halide, a binder, a slightly water soluble basic metal compound, and a dye composition which is decolorized or discolored on heat development, wherein the dye composition comprises an oil-soluble dye formed by a leuco dye and a color developer.

U.S. Patent No. 3,761,942 discloses a thermochromic recording device prepared from reversible photochromic materials, wherein the photochromic materials are dissolved in a plastic matrix, coated onto a substrate, and exposed to light radiation to produce a color therein. The colored layer can be rapidly written upon with low energy lasers or light emitting diodes to effect a visible image.

Allowable Subject Matter

4. Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (703) 308-2302. The examiner can normally be reached on Monday through Friday, 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on (703) 308-2464. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
